## General Manager's Report by Daryl Johnson

Thank you to all who helped out volunteering for the Association during 2018!

The New Year brings challenges that we are all looking forward too. One of the biggest challenges will be the opening of the new pool; for which, I will need trained lifeguards and staff. If you are interested in working for the Association this summer, I encourage you to stop in and fill out an application. For Lifeguards, there are training classes that will need to be completed in order to get your lifeguard and beach certifications. Please stop by the office and express your interest. I will be happy to talk to you about the positions available. Wishing everyone a Happy New Year!!

Time table has been shifted back due to lack of ability to work complete certain aspects of the project due to weather and delay from injunction. Limestone Township has given its approval of the condition of our road post construction trucks driving on same, and the letter of credit regarding said part of the project should be resolved at this time. Daryl is going to follow up with Peoria County regarding the erosion control letter of credit and status of same.

ACM Management Update – Daryl Johnson reported. Paul Gioya attended the Finance Committee meeting this month. The goal for ACM is to have a clean break in the books with them officially taking over everything book wise on January 1, 2019. There was also discussion with the community members present with regard to community members contacting ACM directly instead of going through the RTA Office to resolve issues. Said communication with ACM directly is believed to cost the RTA additional money over and above the regular fees. Daryl Johnson will be confirming said additional costs, but assuming that is correct, the Board urges community members to contact the RTA Office to resolve issues instead of ACM to keep the costs to the RTA down.

Dam Inspection Update – Daryl Johnson reported. The Dam Reports and the videotaping of the dams has been completed. Daryl summarized the Report to state that the condition of the dams was to be as expected given the age of the dams. Overall, the Report reflected the dams were in good condition. Said Dam/Spillway Reports can be reviewed at the RTA Office upon request.

Motion made by Vickie Mulligan, seconded by Shaun Howard, for the RTA to send John Hecker, Daryl Johnson, and Dennis Ryza to the conference with the RTA paying for the \$150.00 conference fees plus expenses not to exceed the sum of \$1,000.00 in total. Motion passed.

**Coin Toss** – 5<sup>th</sup> (1 year) Board Position – Community Member, Ryan Millinger prevailed in the election of the 5<sup>th</sup> open Board Member position. Motion Passed. Discussion of Terese Burdette being the liaison of the Activity and Fundraising Committees, but she is already an officer on one of said committees and she would therefore need to resign that position. Thus, it still needs to be discussed with Terese. Lastly, community member, Vickie Mulligan, seeks to remain working with the Pool Committee, but no formal action was taken on same at this time.

**Everyone in Lake Camelot is on a Septic System which requires routine maintenance to keep them functioning correctly. Taking Care of your Septic System is EXTREMELY important;** and, can save you big \$\$ by not having to replace your entire System, after it becomes clogged from failing to have it emptied regularly. **Adding Chlorine tablets on a regular basis is highly recommended to help keep your system functioning correctly!., Chlorine tablets are conveniently available at the Camelot office,**

WHEN WAS THE LAST TIME YOU  
ADDED CHLORINE TO YOUR SEPTIC?  
How to supply chlorine to the majority of chlorinators:

Typical Septic  
System Lay-out  
(actual arrangement may vary)  
(chlorinators also follow  
mechanical aerobic systems)

**1.** If your system was installed mid 1970's - mid 1980's  
Find the chlorinator recharge pipe located beyond the vents of the septic field. Place solid chlorine tablets in perforated plastic container and lower with synthetic cord (organic cord will rot) until container skims liquid in chlorinator. Secure cord to lid.

**2.** If your system was installed mid 1980's - mid 1990's  
Place solid chlorine tablets in perforated plastic container and lower with synthetic cord (organic cord will rot) to bottom of pipe. Secure cord to lid.

**3.** If your system was installed mid 1980's - mid 1990's  
Remove the 1 - 1 1/2" PVC pipe. Drop solid chlorine tablets into bottom pipe section. Replace 1 - 1 1/2" PVC pipe and weight.

**4.** If your system was installed mid 1990's - 1999  
Drop solid chlorine tablets into pipe.

**5.** If your system was installed 1999 to the present  
Drop solid chlorine tablets into pipe.

**NOTE:** If standing water is observed in the chlorine recharge tube of any system, suspend the chlorine as shown in illustration 1 in order to prevent the rapid disintegration of solid chlorine tablets.
